Subject: We Need Broadband....
Date: Wednesday, June 10, 2015 8:53:12 PM

Hello and thanks for letting us " the public of America" make a comment.

My family lives in Rural America, Niangua, MO.

As a fact, we were the last place in America to get off Party Lines! Yes, we were - check it out.

And we live in the Middle of America.

We understand that while we enjoy many things about living in a rural community - we must make sacrifices.

We willingly make those sacrifices for the life we choose.

Question is, why is Broadband not made available to families "smack dab in the middle of America'. It just does not seem to make any sense at all. You almost can't get more in the middle than where we live.

However, if we must continue to do without...it's ok, we are used to it and Love Living here.

We are Americans and have figured out how to build our business without broadband so far.

So we pay more for being Rural Americans, Life is not fair and we have always understood that. I can't even

use my Tablet from my farm - I am fortunate to be able to use an I-phone (even if is somewhat iffy) from my home.

Security Cameras won't work on my farm. Local Law is beyond our reach, and our gun rights for protection are slowly being taken from us.

Broadband would do so much in adding security for our family and aiding in our business.

Thanks for considering us Rural Americans.
