**Subject:** Bridging the Digital Divide

To who may it concern:

I just read the article "Bridging the Digital Divide " in the "Rural Missouri " magazine from my electric cooperative. It stated to comment to you if without access to broadband. I live about 15 miles south of Harrisonville, mo , about 14 miles north of Achie, mo and 14 miles from Freeman, mo. We truly live in the digital divide. Even though in the towns they get the access to broadband we barely get cell service. We have tried the dish but for several reasons it wasn't working. We have since switched our cell to Verizon. We can get some signal with them. But it to as several problems. The internet connection isn't fast enough and even if it was there is not enough data to be able to watch any kind of video. So this us why I am commenting to you. Thank you for your time and help.

Sincerely,  
Mr. And Mrs. Jeremiah Walsh
