---

I read an article in Rural Missouri about broadband internet. I live where the only option is excede satellite. It is very expensive and limits the amount of usage. I can forget streaming because I will run out of data and drop to speeds slower than dial up. I am retired living on a fixed income and can not afford to up the usage package and even if I could afford it it would still be limited. Satellite is an unfair option we are forced to use to have high speed internet. I would like more information about what the co-op will offer and when it will be at the gascosage co-op.

My granddaughter lives with me which means I will need a better option very soon.

Thank You  
Kathy Hensell
