**Subject:** Please help I need internet for my little girl's homework

I live on [REDACTED] in Missouri and I have no access to the internet . I have a [REDACTED] year old daughter . That goes to TROY R 3 school . And they're doing away with their books in about 3 years . So all books will be the internet. I live about 15 miles from a restaurant that offers free WiFi for homework. That's a lot of time and money for gas . But I don't want my daughter to fail in school . Centurylink has lines but they are exhausted .That's what they told me . And they won't run more lines .
