---

I am submitting this as a public comment in response to your Notice of Inquiry to Explore a New 5G Challenge. 5G technology uses the same electromagnetic frequencies as is used in the Pentagon Crowd Control Program. It is a pain inflicting military weapon, even if you don't feel it, your cells do! At 60Ghz 5G impares oxygen absorption by the blood. One advisor to the World Health Foundation said, "There's enough evidence that if they re-evaluate radio-frequency radiation it would be placed in a class 1 catagory which is a human carcinogen. The answer is wired connections for your devices, not 5G!

Respectfully,

Krista Hess-Mills
